

An energy efficiency case study

Helping members to make savings in their energy costs is a key part of the value we offer you through your framework agreement. We work with our suppliers to make sure that all of our members have access to the expertise necessary to help them make sound energy saving decisions. We know you need:

- To **REDUCE** costs and CO₂ without affecting your service.
- Investment grade proposals that **STAND OUT**.
- ACCREDITED** information that you can share with your stakeholders.
- Help to find investment **FUNDING**.

For Greater Manchester Police HQ we brought in the experts at EDF Energy

The results are impressive. In a building only 4 years old, 7 ways to save money and carbon were identified by a comprehensive on-site audit.

The British Standard BS EN16247 audit led to a compelling business case that detailed investment, funding and reporting. This helped overcome any procurement barriers and what's more, the ability to choose to spread the payments for the improvements through invoices is turning theory into reality, **quickly and easily**.

Getting your energy saving programme started

83% of CCS customers surveyed expect to plan an energy efficiency project in the next 3 years*.

If you're not sure where to start, we can help in a simple and straight forward way. That's because the framework Crown Commercial Service has in place provides a unique opportunity for its members to achieve sustainable change.

We've asked suppliers like EDF Energy to actively work with our customers to help them save. The EDF Energy team will provide the **start** point, **support** you through the investment and **measure** the success.

[^]Estimated savings and investment figures are based on Greater Manchester Police HQ implementing the measures recommended in its 2014 energy audit. Calculations are based on current site energy usage, EDF Energy's estimate of the likely installation costs and assumes that the site's energy requirements and energy prices remain the same. Individual savings may vary. EDF Energy is a trading name used by EDF Energy Customers plc, Reg. No. 02228297 whose Registered Office is at 40 Grosvenor Place, London SW1X 7EN, incorporated in England and Wales. The responsibility for performance of the supply obligations for all EDF Energy supply contracts rests with EDF Energy Customers plc.
